ISSUE:

A resolution authorizing the purchase of a Microsoft SQL server software upgrade and new server hardware from Western States Contracting Alliance (WSCA) through Valcom Computer Center.

SYNOPSIS:

The existing SQL server has reached end of life and no longer has the capacity to support the City's database infrastructure.

BACKGROUND:

Formal bidding will not be required for this purchase because this vendor holds a contract with the State of Utah. If approved, this purchase would replace the City's SQL database server with increased capacity and the latest version of Microsoft SQL software. The need for this purchase is due to additional applications the City has installed that require SQL server to function, the growth of existing databases and the age and reliability of the server hardware. Additionally, several of our software vendors require the City to use the latest version of Microsoft software. This purchase includes the database server equipment along with maintenance and support for a four year period.

* This amount will be financed through the HP Lease Purchase Agreement previously approved on January 3, 2006 under Resolution No. 06-04 an a 4 year lease.

RECOMMENDATION:

City Staff recommends approval of the Resolution.
